

Augmented Roleplay

See your adventures as you always imagined them

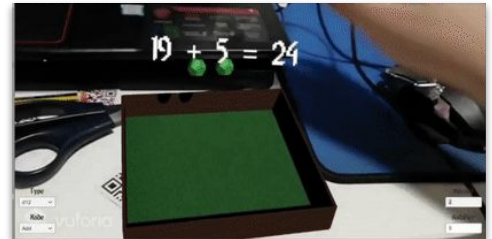

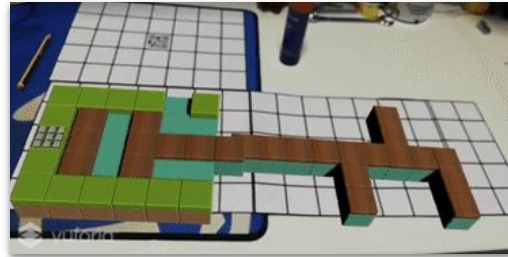

Our Proposal

- **Solution:** Theater built through AR cards and managed by a phone App.
 - **Localized and Portable**
 - **Customizable and Limitless**
 - **Fluid and Permanent**
 - **Augmented Reality 3D**
 - **Easy Interaction**
 - **Plan Ahead**
 - **Absolutely Free!**

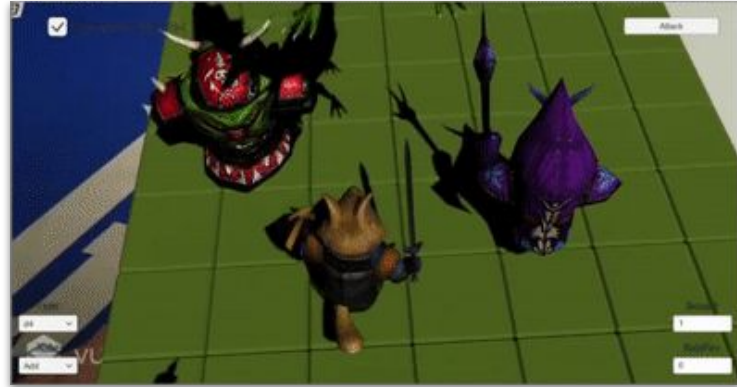

Localized and Portable

- Your entire fantasy world inside your phone and a deck of cards/papers.

Augmented Reality 3D

- Your worlds and characters in spectacular 3D filled with life, exactly how you envisioned them. All while playing in the same room with friends!

Easy Interaction

- Manage your maps, characters, dice and NPCs live through your phone.

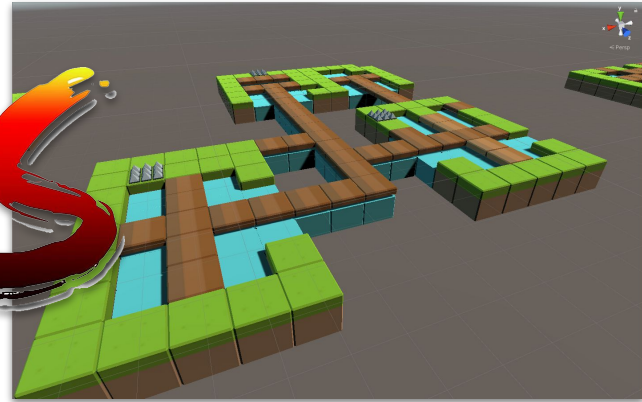

Plan Ahead

- Get your session prepared long before it starts. Play as soon as possible!

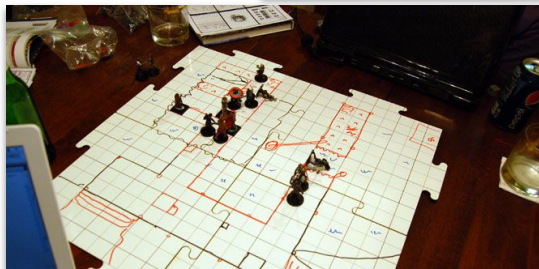

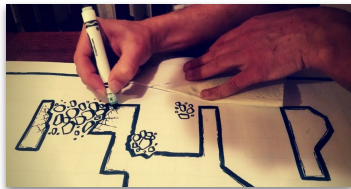

Manually draw each one and either do it every time before you play or carry a bunch of giant maps around!

Import a map or create your own using assets, save it on your phone, then use or recycle it as many times you like!

The World in your hand. Absolutely Free!

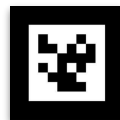

- No more expensive miniatures, no more drawing on worn off Battle Mats, no more carrying a suitcase full of stuff! Just use your phone!
